

POLYETHYLENE FOAM SHEET – PEPI®

Technical Data Sheet

PEPI® FOAM PLANKS

Material	Low density non-cross-linked polyethylene foam
Thickness	max 100mm
Width	max 1200mm
Length	max 2400mm
Density (kg/m ³)	24
Color	Natural white; Grey to slightly black
properties	
Impact sound insulation	17dB
Improved shock and pressure resistance	
Moisture proofing	
Heat insulation	

- Custom sizes and color are available to special order

PEPI® ROLLS

Material	Low density non-cross-linked polyethylene foam
Thickness	0.6-5mm
Density (kg/m ³)	24
Roll width	max 1300mm (2000mm to special order)
Roll Ø	800mm
Color	Natural white; Grey to slightly black
properties	
Impact sound insulation	17dB
Improved shock and pressure resistance	
Moisture proofing	
Heat insulation	

- Custom sizes and color are available to special order

This product has been especially produced for:

- 1) Flooring underlay (layer between parquet or laminate and floor).
- 2) Packing material (layer between furniture parts etc.) It is optimal protective layer of surface toward mechanical damages.

Product is Freon free. The usage of product isn't dangerous to humans nor to environment. Product is 100% recyclable.

Manufacturer: PEPI RER SIA
